Defense 3D visualization, simulation, and training market to grow quickly

Posted on Thursday 15th April 2010 | Defence

Worldwide spending on hardware, software, and services for 3D visualization, simulation, and training in the defense and government segment will reach \$16.5 billion in 2010 and grow to \$20 billion by 2015, according to Acacia Research Group's latest market study, ***Opportunities in 3D Visualization, Simulation, & Training 2010-2015: Defense & Government.***

Worldwide spending on hardware, software, and services for 3D visualization, simulation, and training in the defense and government segment will reach \$16.5 billion in 2010 and grow to \$20 billion by 2015, according to Acacia Research Group's latest market study, *Opportunities in 3D Visualization, Simulation, & Training 2010-2015: Defense & Government*

"The 3D visualization, simulation, and training defense and government market is on the cusp of another disruption," said Christine Arrington, senior analyst for Acacia Research Group. "3D capable browsers, ubiquitous 3D on the desktop, in notebooks, and in handheld devices will make 3D accessible to a large portion of the defense and government workforce, "Hardware makers, application developers, and service providers will have to evaluate their business models and their development strategies to take advantage of the new opportunities that will appear worldwide over the next five years. Those who adapt will benefit; those who do not will suffer."
